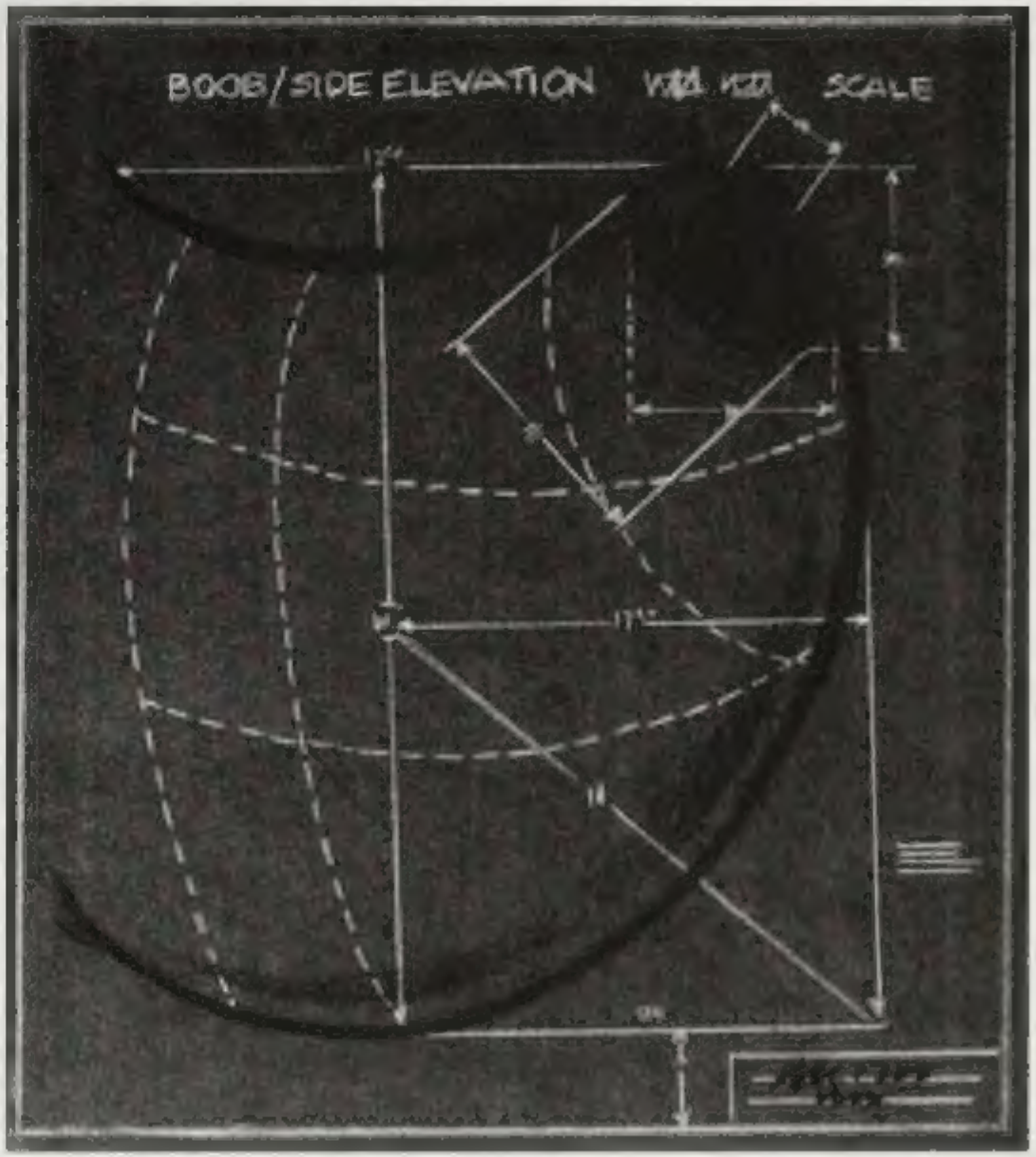
THE STANDARD HOOTER

There are no standard hooters, of course; they're all different, and this book proves it. But, if you are going to look at a big bunch of variations, you've got to have a bench mark, sort of. So here it is for comparative purposes—The Standard Hooter, compiled from the fantasies of a thousand teenage boys.



THE STANDARD HOOTER

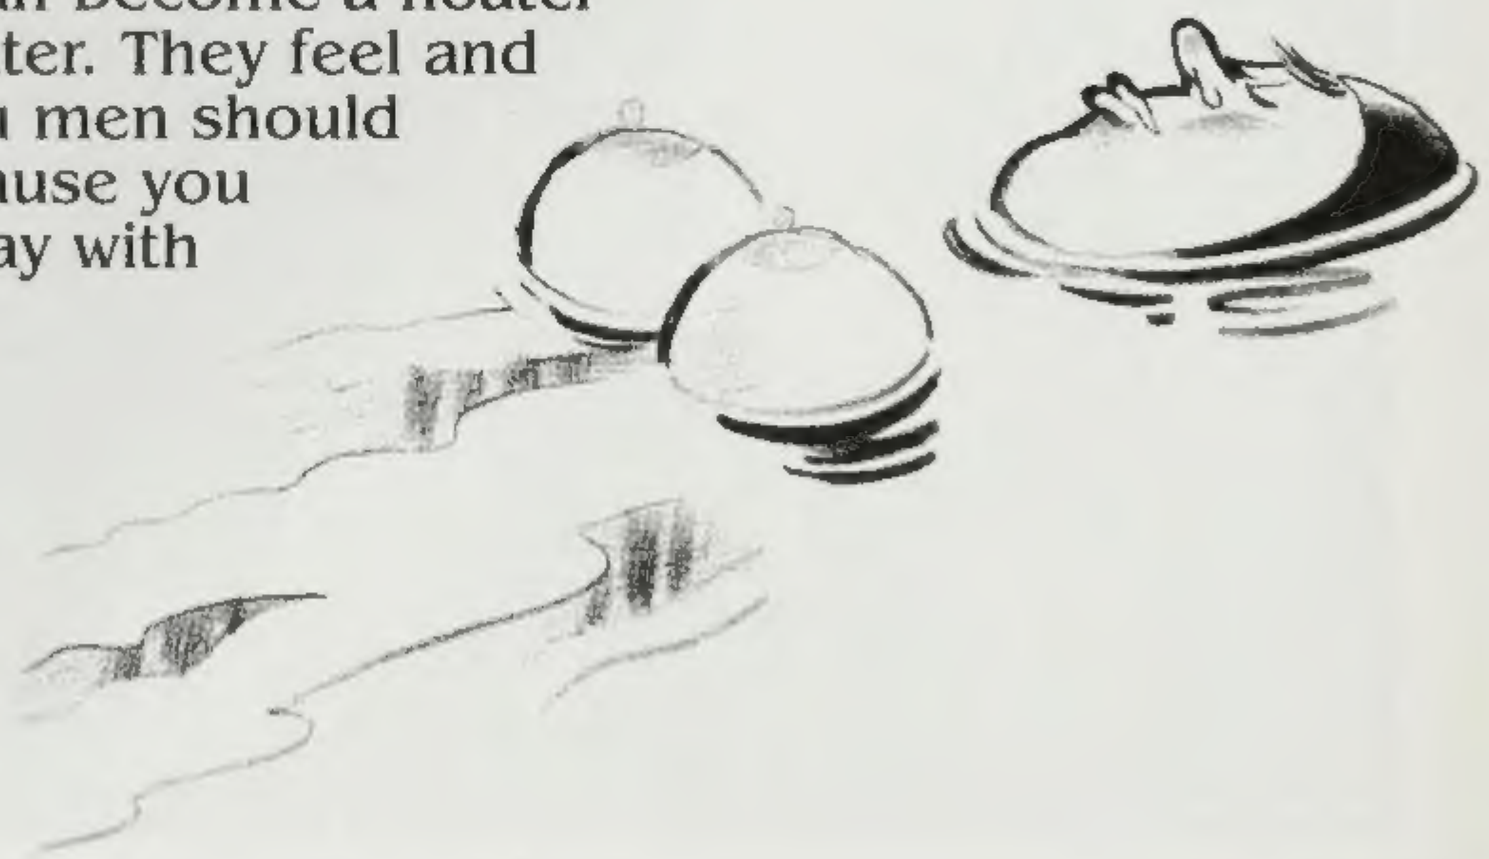
DISAPPEARING HOOTERS

DISAPPEARING HOOTERS

Did you ever notice how even the most gigantic hooter disappears when a woman lies on her back? This vanishing is a mystery that has troubled mankind for centuries. Where do you suppose the thing goes? How come cellulite or bald spots don't disappear like that?!

FLOATERS

Floating upward, gently drifting, bobbing, dipping, never sinking. Any hooter bigger than teeny weenies can become a floater when immersed in water. They feel and look great, and all you men should eat your hearts out 'cause you don't have them to play with in the tub.



FLOATERS

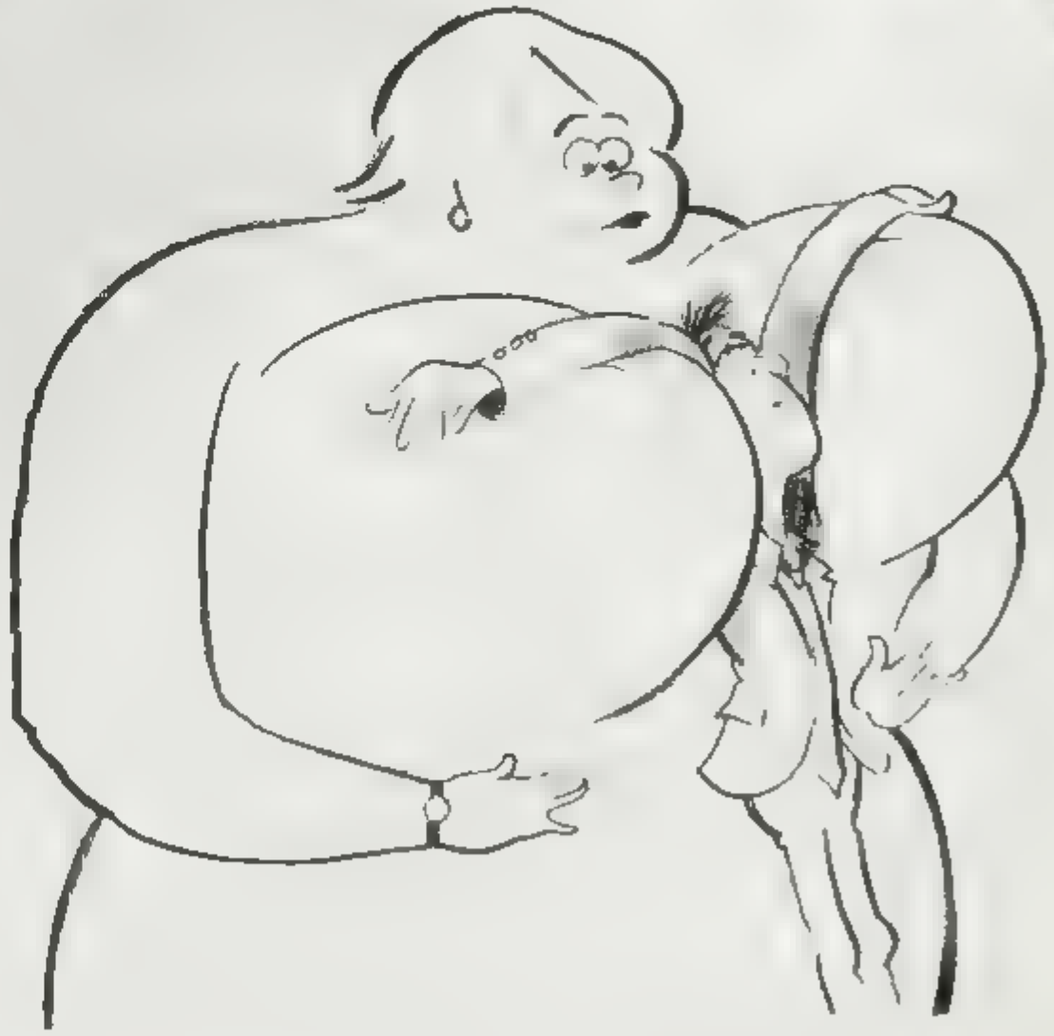
HARD HOOTERS

HARD HOOTERS

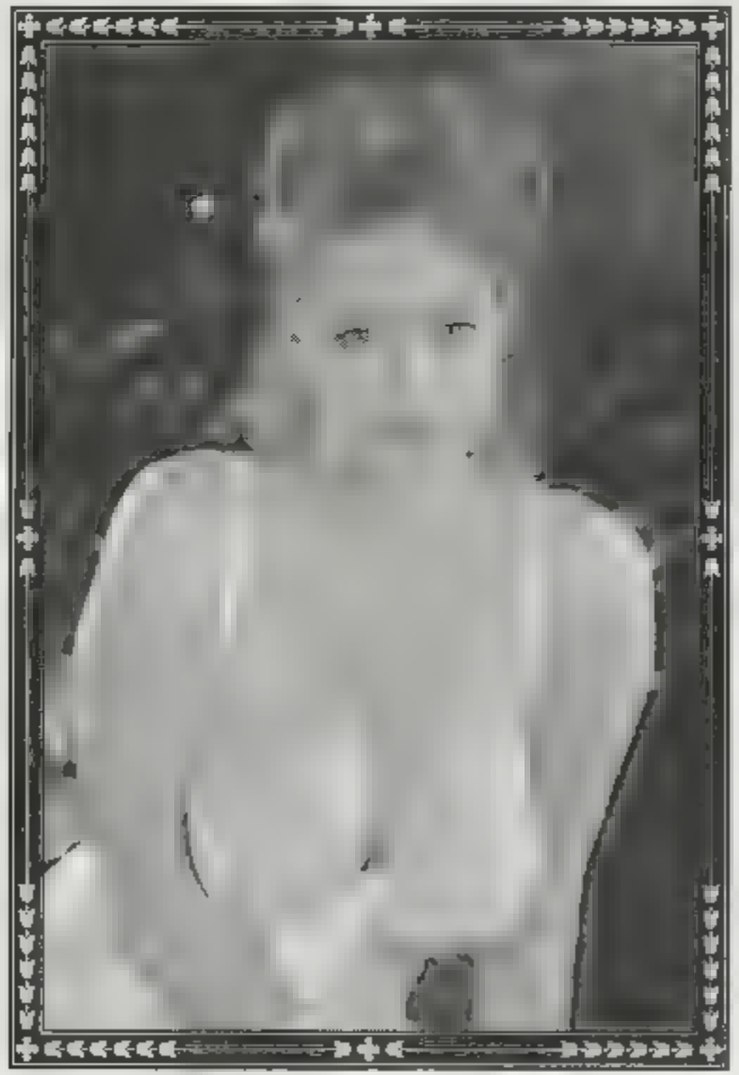
Maybe there used to be hard hooters in the olden days, but I think they're a product of the present fitness craze. Can you believe what aerobic classes and bench presses can develop on a physically active woman? One wonders at the toughness of a generation of babies forced to suckle on these tootsie rolls.

PILLOW HOOTERS

These hooters are defined not as much by size or shape as by their comfort and snugliness. A secure, warm haven from the troubles of the world, a comfortable retreat from stress and worry. The owners of Pillow Hooters never have to worry about a date on Saturday nights.



PILLOW HOOTERS



OH WOW HOOTERS

OH WOW HOOTERS

Because of size or shape or jiggle or exposure, the Oh Wow Hooters stop 'em in their tracks. Some people stare unabashedly and some peek sideways. The owners of these hooters often pretend to be totally oblivious to all the attention, but it actually dominates most of their waking hours.

THE ENIGMA HOOTER

Maybe it's big and maybe it's small and maybe it's really not there at all. But you're not going to find out 'cause this hooter is so swaddled in baggy clothes that not the slightest trace of its outline remains. It seems a terrible waste of what is usually such a lovely shape, but hey, fashion dictates keeping up the layered look.

THE ENIGMA HOOTER

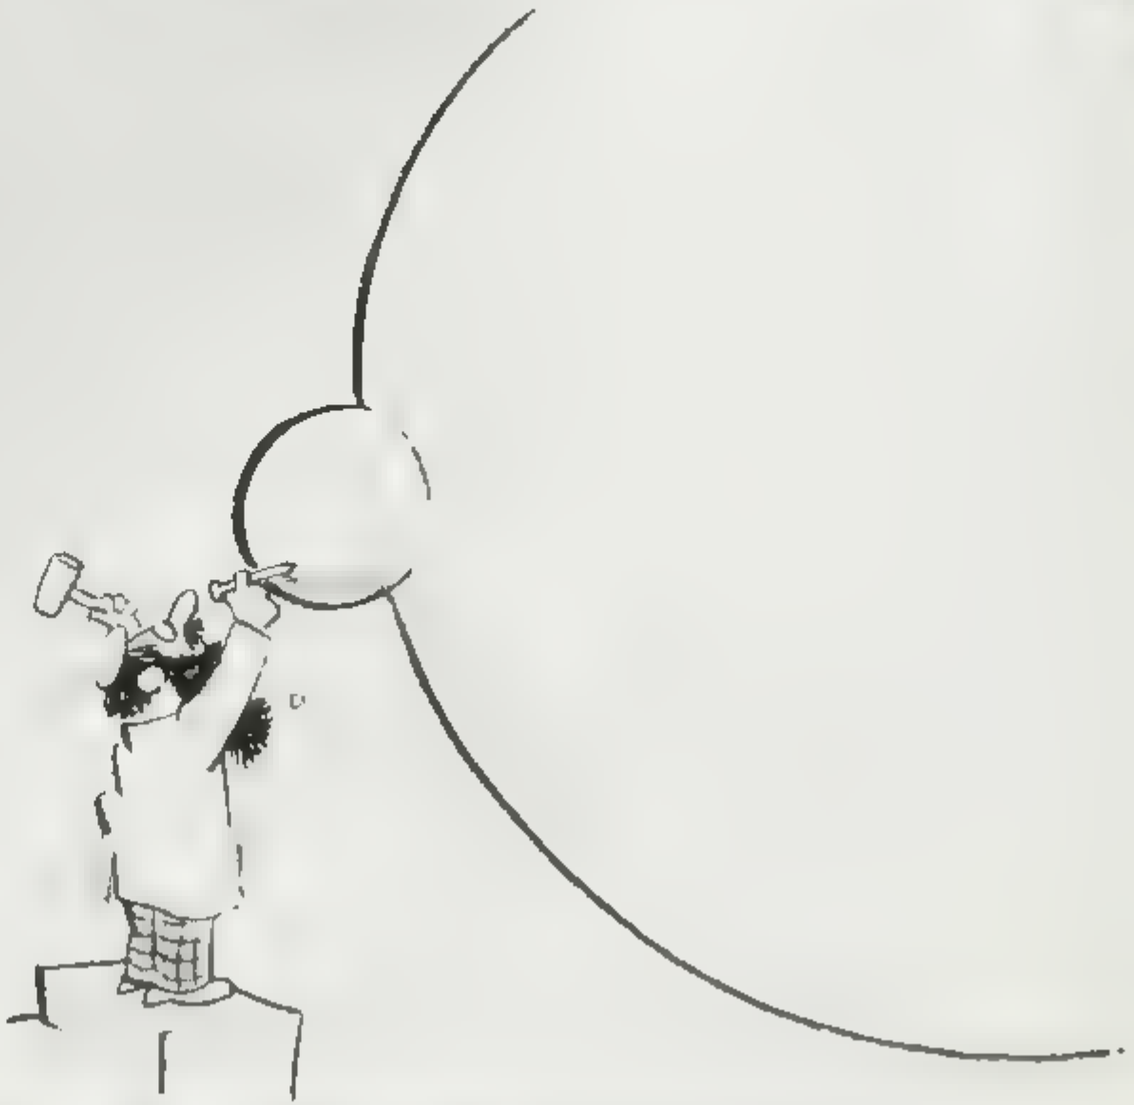
SOFT HOOTERS

SOFT HOOTERS

Soft Hooters are feminine and beautiful and everything a hooter should be. Modern stretchy bras enhance these charms. Do you remember those old-fashioned clamp and stick 'em out bras? They could take the softest, most tender hooter and make it into a dangerous weapon.

NIPPLES

Nipples could be an entire book by themselves. Round nipples, oval nipples, big nipples, innies, outies and protruding and brown and pink and who has time to list them all... Look, if you want to read about nipples, write my publisher and maybe she'll hire me to do another book.

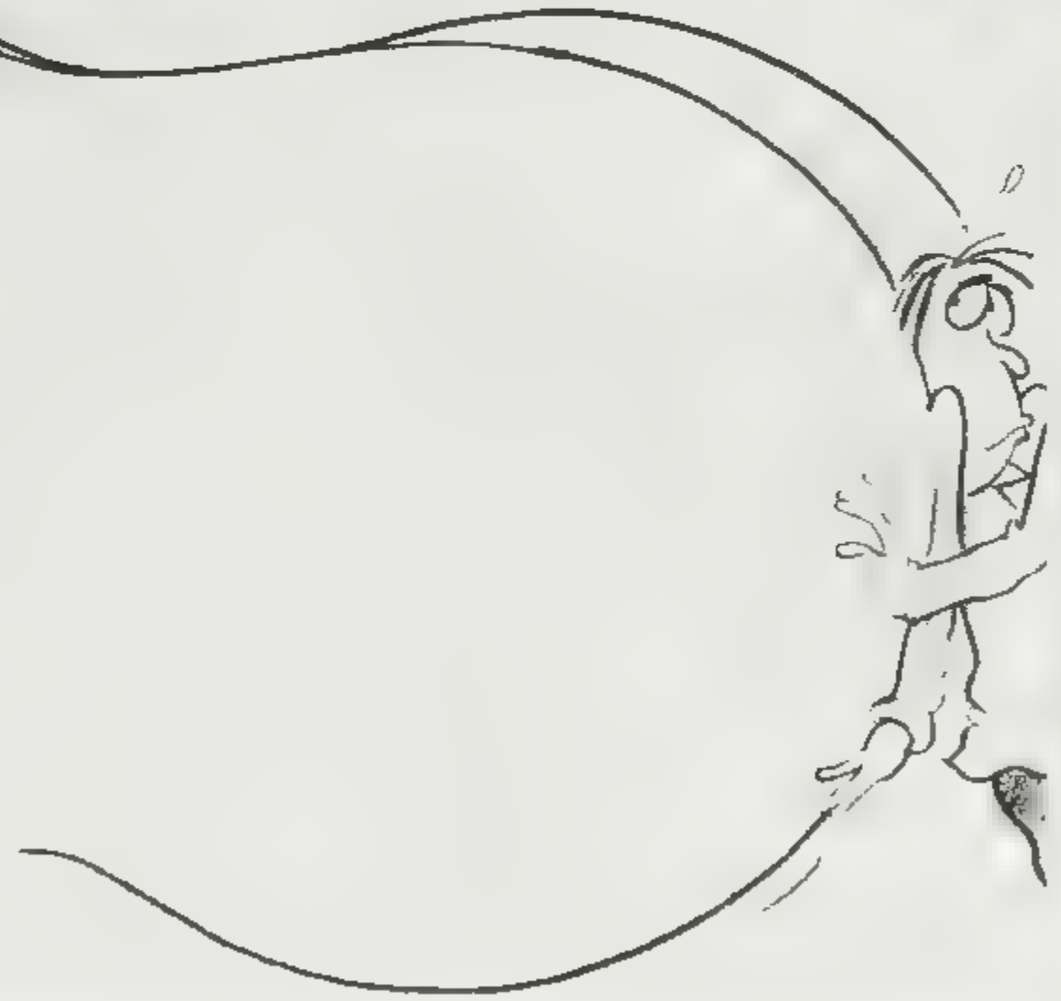


NIPPLES

THE WORLD'S LARGEST HOOTERS

THE WORLD'S LARGEST HOOTERS

The World's Largest Hooters are owned by a lady named Samantha who lives in Cambridge. Hers weren't always the biggest, but she got involved with a bunch of doctors from Harvard Med and they all started competing to see just how big they could make her. Between the silicone, the implants and the cotton balls she was so fond of using, they became very big, indeed.



MUFFINS

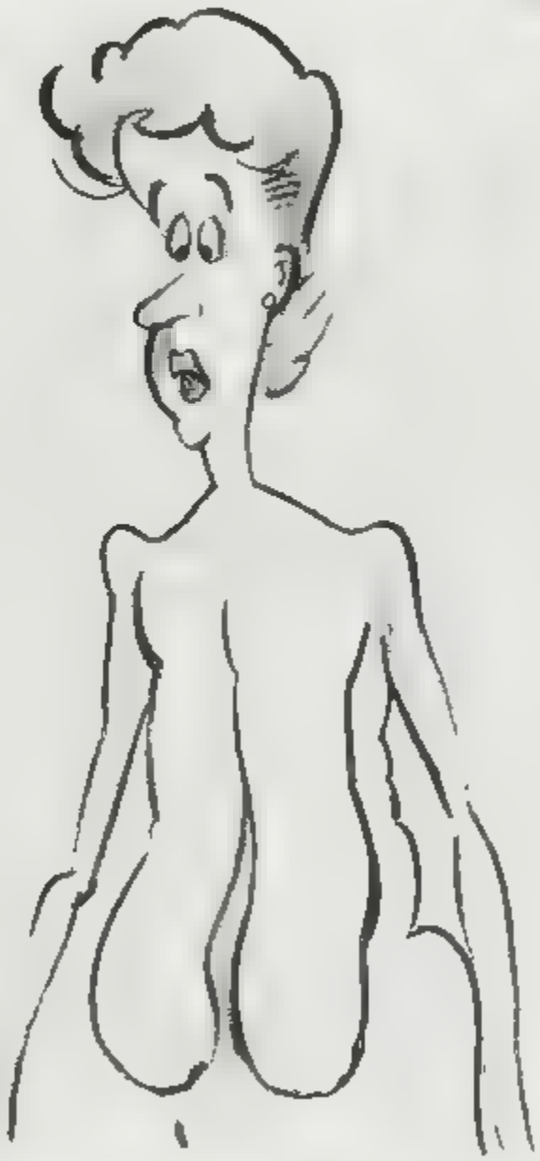
A preppy kind of hooter. It's small, tasteful, community-minded and demure with small rose-colored nipples that never, ever get hard, and they go just perfectly with green polo shirts.

MUFFINS

FLAPJACKS

FLAPJACKS

This is not a pleasant hooter to write about. Flapjacks are colossal hooters, real humongers that have fallen (you should pardon the expression) on hard times. Enough said.



SPREADERS

Spreaders are hooters that seem to be repelled by each other. They're separated by a large, ever-increasing space, as if designed to nurse a set of twins who can't bear to be in the same room together. And you thought you had trouble finding a swimsuit.

SPREADERS

OFFSET HOOTERS

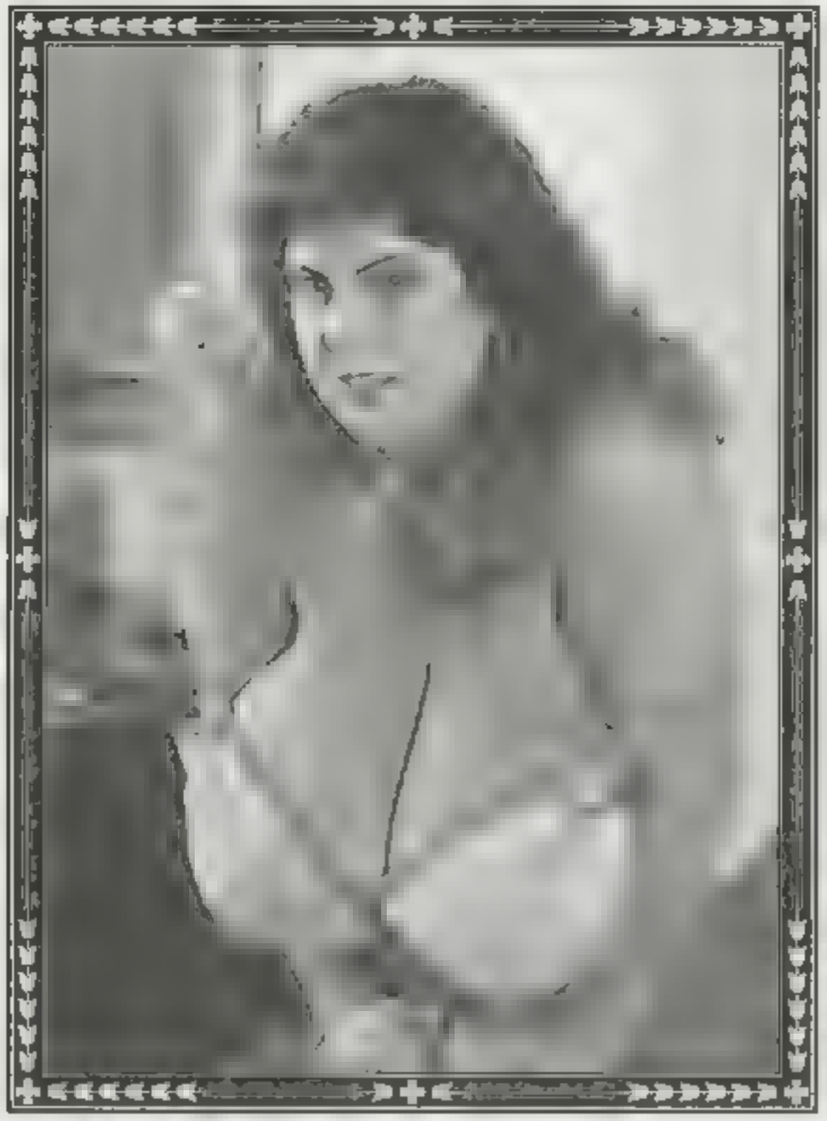
OFFSET HOOTERS

Au natural, these are rather common but every now and then, you'll run up against an Offset Hooter tough enough to tilt a bra and full set of clothes. It makes you wonder if the floor is slanted. What's the big deal! If feet can be different sizes and eyes different colors, why can't hooters vary a little?

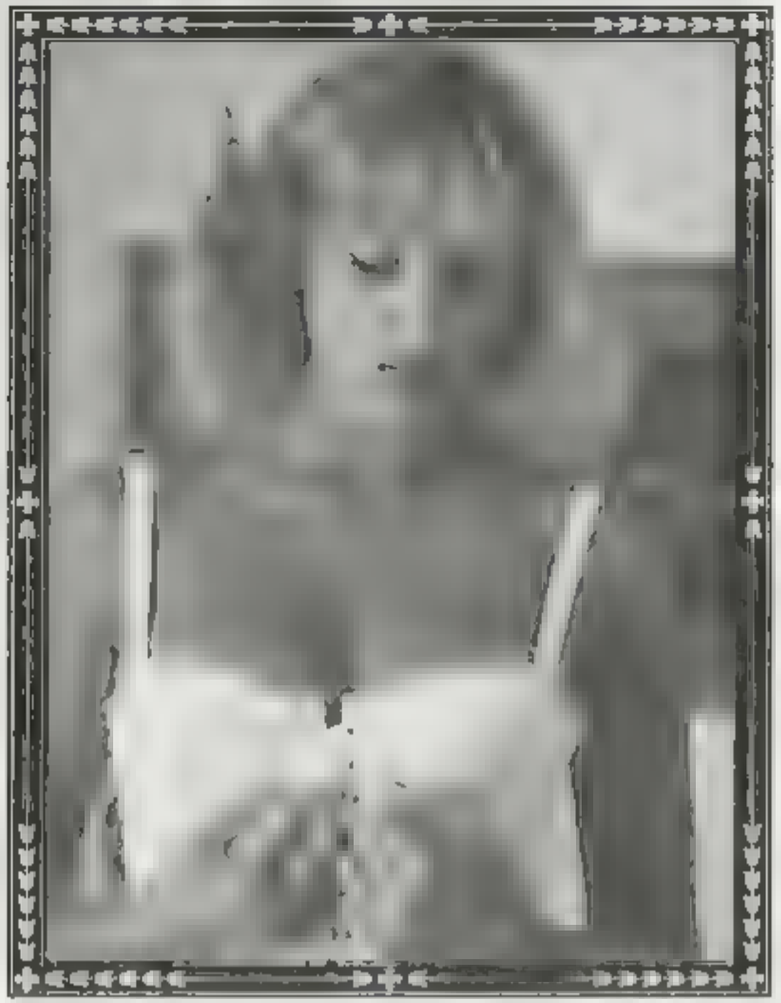
DROPPED HOOTERS

These hooters still have their nice round shape except they hang down a foot or so from where you'd expect them to be. Some people just have stretchy skin and gravity takes advantage of this to pull the hooter down. Hanging upside down, of course, corrects this problem, but it makes it so awkward to carry on a conversation at cocktail parties.

DROPPED HOOTERS



HIGH SCHOOL PROM HOOTERS



HIGH SCHOOL PROM HOOTERS

This is a hooter whose owner thinks it is always slipping out of its first strapless prom dress. The lovely, young thing spends the evening tugging up on her front. The real problem is that there just isn't enough there to hold up a dress. In the history of the world, however, no hooter has ever popped out of a prom dress.

BB HOOTERS

The term hooter really can not be applied to this boob. Even so, though they may be tiny, they are just as responsive and tingly and pert and cute as the biggest hooter in the world. Some years ago, I wrote a book, "Small Busted Women Have Big Hearts," and it sold about a million copies. A sequel called, "Big Busted Women Have More Fun' didn t do nearly as well. There are lots more women out there who think they are smaller than they really are, and it's this majority that is really having the most fun.

BB HOOTERS

PENDULUMS

PENDULUMS

Some hooters are sexy and some cuddly and some positively dangerous. Watch out for Pendulum Hooters in aerobic classes. These hooters can generate an awesome swing. Actually, women with Pendulums tend to be sedentary in their life style.

STAR GAZERS

What can you say about this perfect hooter? With its firm and perky upward tilt, it's every man's favorite and every woman's dream. Women with Star Gazers also have long eyelashes, never get pimples and can eat Häagen-Dazs ice cream all day without gaining weight.

STAR GAZERS

HIDDEN HOOTERS

HIDDEN HOOTERS

This is another hooter that occurs only when the woman is lying down. It shouldn't, however, be confused with the Disappearing Hooter which vanishes completely. The Hidden Hooter, in contrast, quietly slips over the side of the torso and hides, tucking itself into a nearby armpit.

SQUASHED HOOTERS

This is a common hooter, having pretty good mass but no particular tone to hold it together. The Squashed Hooter takes on the shape of whatever holds it. Given the right bra, this hooter can look pretty nice, but in something like a tube top, its shape can be, well, totally squashed.

SQUASHED HOOTERS

LUMPY HOOTERS

LUMPY HOOTERS

There is not much you can do with Lumpy Hooters other than try and hide them. People with Lumpy Hooters spend much of their time doing just that. The baggy look was developed by a designer with Lumpy Hooters, as well as the whole idea of closing your eyes while kissing.

DANCERS' HOOTERS

Hard as apples with no jiggle or bounce, at least when performing classical numbers. Made of solid muscle and exercised for eight hours a day since childhood. If they were big and bouncy, they d have been thrown out of dancing school years ago.

DANCERS' HOOTERS

LEDGES

LEDGES

These hooters protrude with wonderful cantilevered thrust and power. The unusual, flat, upper surface is particularly intriguing to members of the engineering community. They are sort of like a small helicopter landing pad. For some reason, Ledges tend to defy the effects of gravity well past middle age.

SIDEWINDER HOOTERS

These are big hooters, no bones about it, and well-shaped. They're so big that somehow there doesn't seem to be enough room for them out front, and parts of them mosey around each side. Coming straight at you, Sidewinder Hooters are an awesome sight.

SIDEWINDER HOOTERS

PONTOONS

PONTOONS

A swim coach named Patti pointed these out to me. Pontoon Hooters support a woman's body high in the water and help her swim much faster. Most male swimmers would die for something like Pontoon Hooter. These hooters are probably hollow, but no one knows for sure.

SAUCERS

Saucers are gigantic hooters that start at the chin and circle around to the neighborhood of the belly button. Although their diameter is impressive, these hooters don't stick out very much, sort of like a big saucer, which is where the name came from, I guess.

SAUCERS

JOGGERS' HOOTERS

JOGGERS' HOOTERS

Some joggers are natural and free spirited, and their hooters look like this:

Other joggers are a little shy or conservative, and their hooters look like this:

Because they are encased in a joggers' bra that looks like this:

Joggers' bras are not much fun to run into.

HIGH HOOTERS

I went with a girl named Ellen once, who told me she had high hooters. She never, of course, let me near them, so I can't be too sure about this description. But I surmised they sort of started at her collar bone and soared up from there to a point just under her chin. Ellen is as pretty as ever and still lives in Hempstead; but she's married now.

HIGH HOOTERS

LOW HOOTERS

LOW HOOTERS

No one wants to be stuck with Low Hooters. Even flat chested women wouldn't trade for Low Hooters. Having Low Hooters is like having a pregnancy that lasts forever. Heaven knows there are enough women out there with Low Hooters, and I hope writing frankly like this will not disturb any of the them 'cause I wouldn't want to feel responsible for any psychiatric bills. And for Pete's sake, don't start sending nasty letters 'cause it upsets my publisher.

NICE LITTLE POINTERS

Just like the name says, they're pointy and nice and little. It's sad so many of the owners of Nice Little Pointers think of themselves as flat chested. They are not. They're sexy and appealing and just happen to be put together in a modest but manageable package. Let's hear it for Nice Little Pointers.

NICE LITTLE POINTERS

MELONS

MELONS

These are earthy, motherly hooters that seem to exude a healthy, pleasant aroma and fertility. Melons are like a bountiful Italian meal, served with love, eaten with gusto, washed down with a hearty red wine, while the young people dance a tarantella in the small village square. Of course, Melons can be Jewish or Hungarian also.

NUBBIES

Nubbies are small boobs of no particular shape that are probably still growing. They're of interest mainly to teenage boys who stalk them endlessly, but in the rare instance when they catch one, they don't know what to do with it. Nubbies are definitely a teenage boob that has the potential to blossom into almost anything.

NUBBIES

HARD NIPPLE HOOTERS

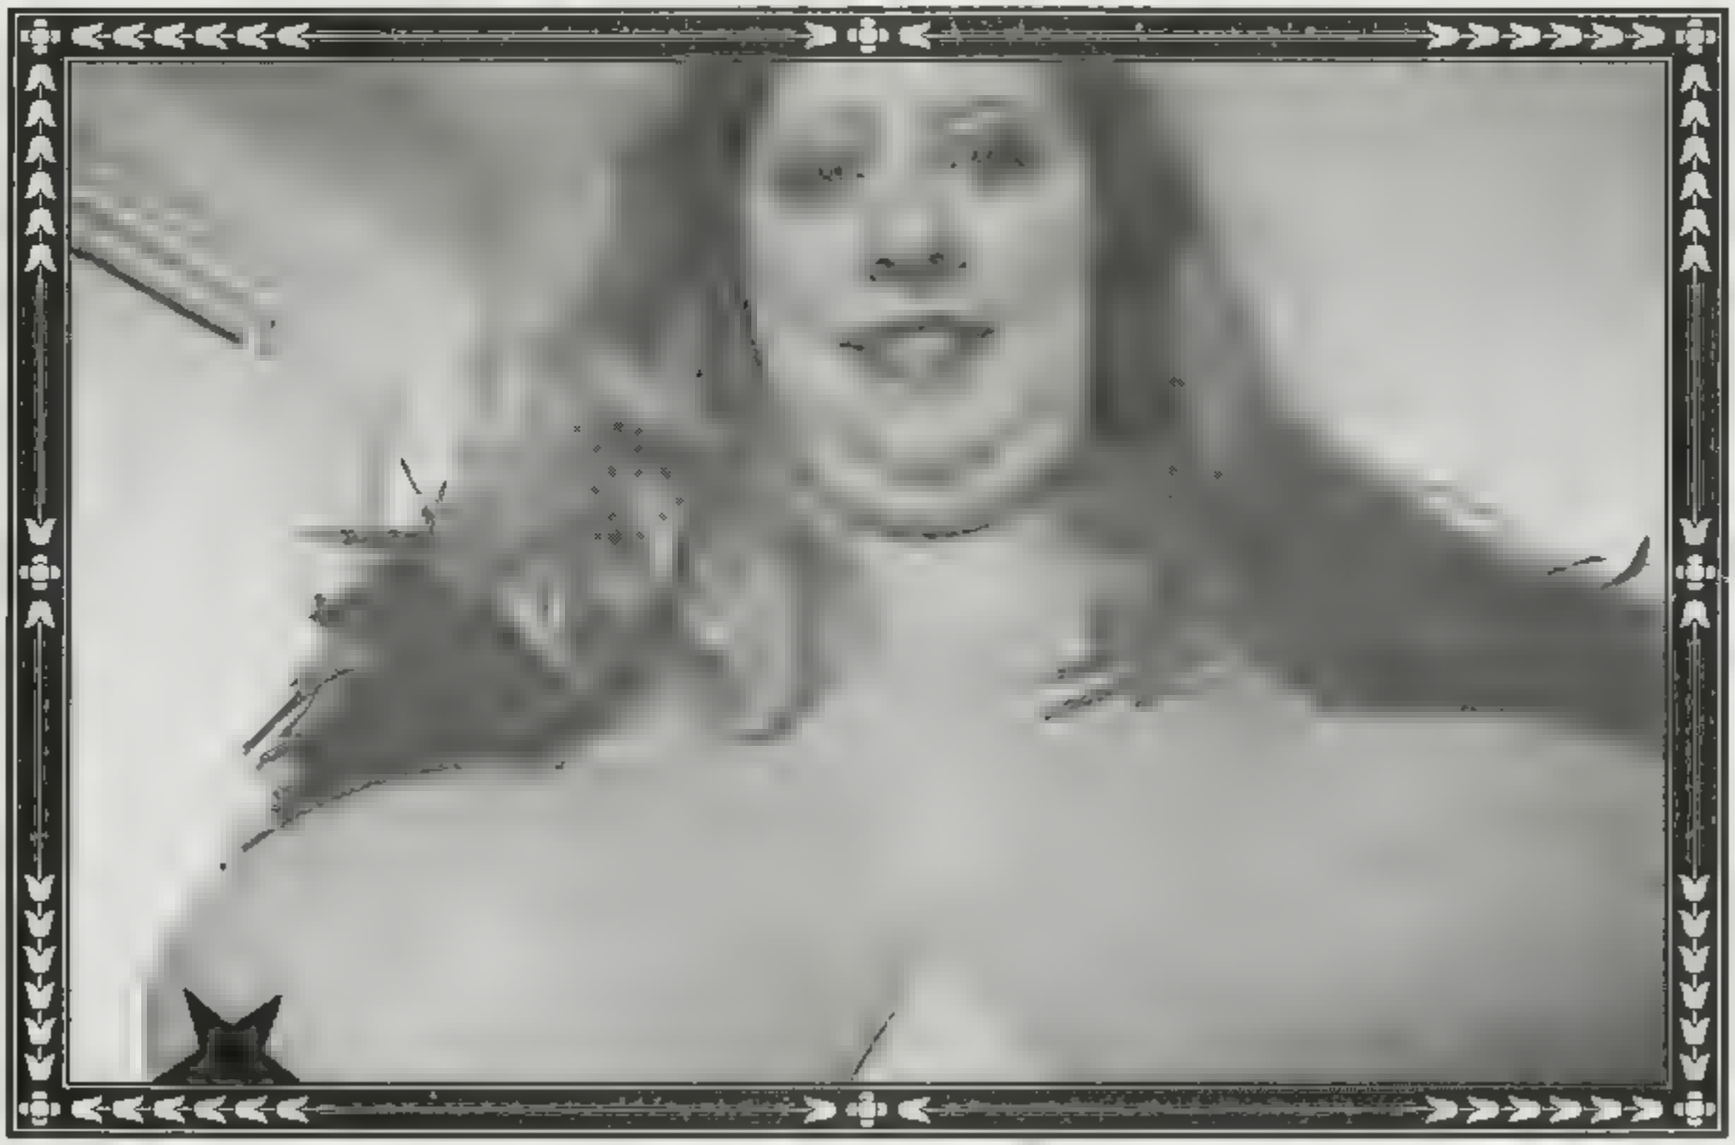
HARD NIPPLE HOOTERS

I just learned about this one last week. A woman I know feels shy when her hard nipples protrude through thin blouses. She controls hers with Band-Aids, but warned me that you have to use the little round ones. The rectangular Band-Aids tend to make the nipples look squarish. Do you suppose it hurts when you take the Band-Aids off?

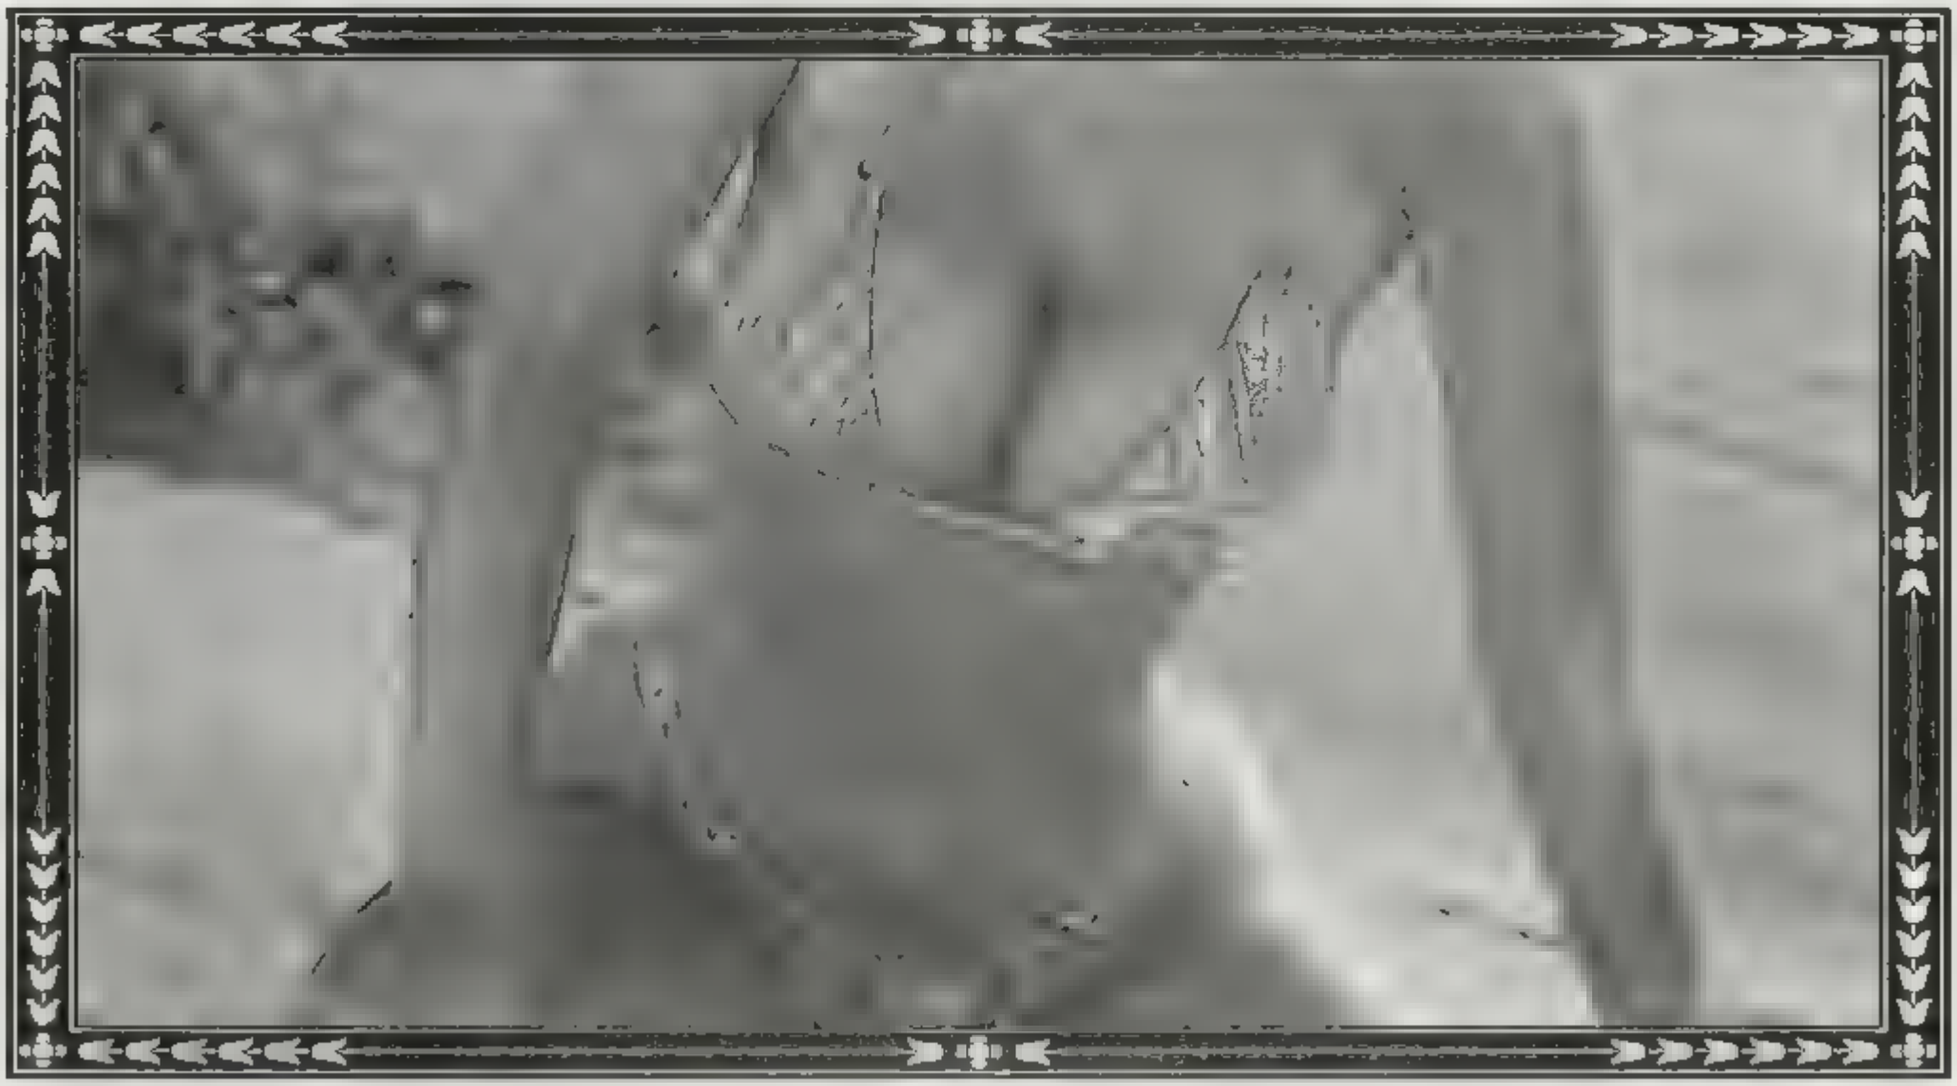
HUMUNGERS

You don t get much larger than Humungers. These hooters are a constant challenge to bra manufacturers and to their owners when entering small spaces. Women with Humungers treat revolving doors, telephone booths, elevators and sports cars with profound respect.

HUMUNGERS



BIG BREATHS



BIG BREATHS

A doctor was examining a teenage girl. As he put the stethoscope to her chest, he instructed, "Big breaths." "Yeth," she replied proudly with her lisp, "and I'm only thixthteen."

NINNIES

Ninnies started out as Nubbies and just never developed. Breast cream, rubber massages, nautilus machines, bales of cotton and endless prayers all failed to deliver. Ninnies are great, however, for going topless at gay beaches.

NINNIES

CHESTS

CHESTS

Chests are big, imposing hooters with a maximum of mass and a minimum of shape. They spread out and cover the entire torso of the owner, filling the whole area, bordered by chin, waist and arms. Get a woman with a Chest angry at you and you'll quickly realize what a formidable weapon a hooter can be.

DINGERS

"Dingers,' 'Dingers"—it sounds like a tough term, but it is really quite complimentary. Probably comes from "Hum Dingers." When Dingers walk into a bar, the locals always rate them 9 or 10. Dingers meet lots of men in bars who don't eat quiche or yogurt.

DINGERS

ROUNDERS

ROUNDERS

Spherical, really, and an almost perfect shape. Women with Rounders even refuse to sleep on their stomachs. 86% of Rounders' owners have been to a topless beach. 78% don't wear a bra and still 92% spend over four hours trying on swimsuits before buying.

JINGLE BELLS

A bouncy, merry hooter, pert and pretty and full of Christmas cheer. During the holiday season, women with Jingle Bell Hooters consume much too much egg nog and often fall asleep with their noses in the plum pudding.

JINGLE BELLS

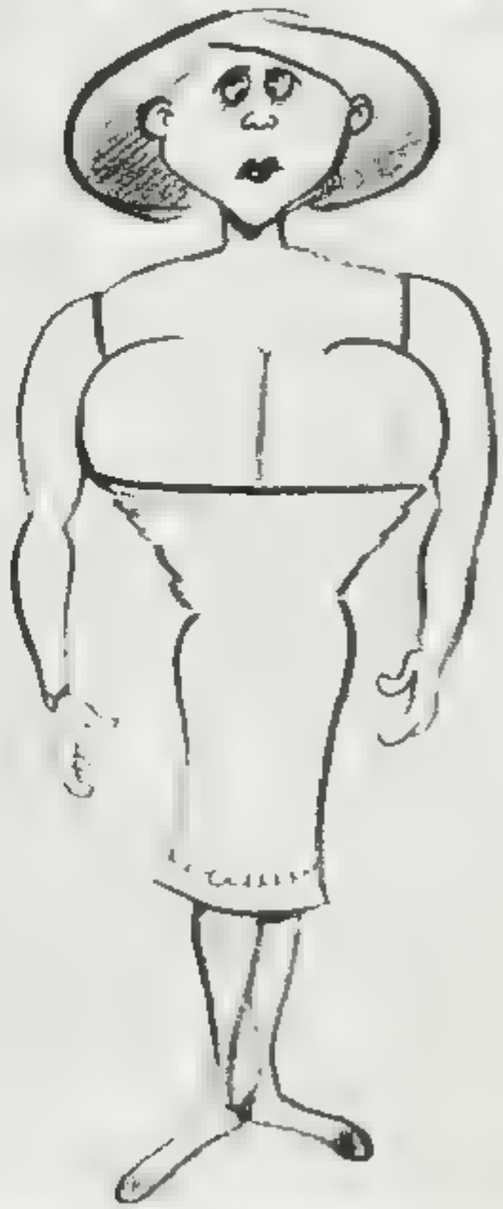
FAR APART HOOTERS

FAR APART HOOTERS

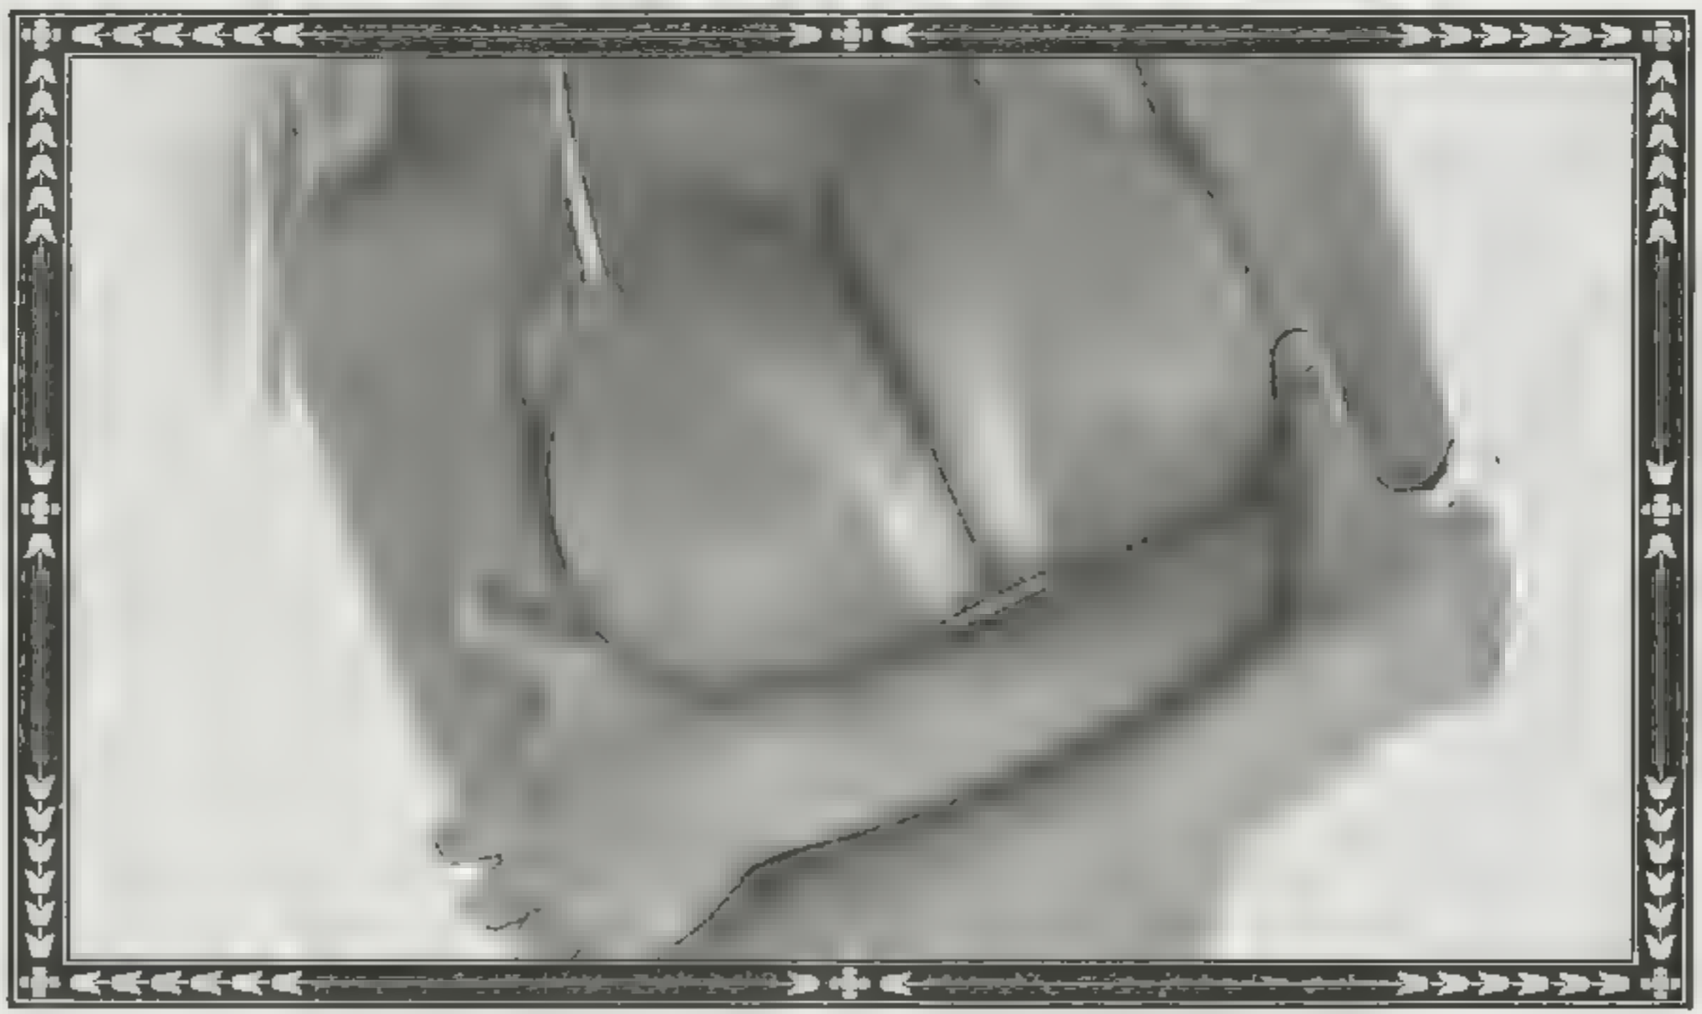
These are nice, regular kind of hooters that just happen to have a lot of space between them. There is no chance for cleavage with the unfortunate devils, just a big expanse of chest bone and a hooter in line with each shoulder. Sadly, women having Far Apart Hooters are often very ticklish, which is a terrible affliction with all those ribs showing.

CLOSE TOGETHER HOOTERS

Close Together Hooters are a definite upper. They're friendly with a snuggly countenance and a place to catch cookie crumbs when you eat in bed. It is almost impossible to lose earrings with really Close Together Hooters.



CLOSE TOGETHER HOOTERS



MYSTERY HOOTERS

MYSTERY HOOTERS

These hooters are like chameleons, only they change size depending on the time of the month. This makes getting a wardrobe to fit a real hit or miss affair. If they can afford it, Mystery Hooter people have two entire sets of clothing.

VOLCANOS

Volcanos are not meant to denote seething passion or hooters too hot to handle. The term only refers to the shape. Volcanos can be big or small, but all from a delightfully perfect cone. The Japanese revere the perfect volcano shape of Mt. Fuji. Maybe that's why they make such good cars.

VOLCANOS
